novel contributions. The research may largely recombine or restate known ideas without adequate differentiation. Significant revision is needed to establish clearer novelty, identify genuine research gaps, and demonstrate measurable advances beyond the current state of the art.

## Overall Dimension Scores

C01	Palestinian conflict through analysis of the Palestine Body Count dataset (2008–2023).	1	0	1	MEDIUM	memorialization study, but no baseline comparison.
C02	This research contributes to understanding how open-source data repositories can restore epistemic integrity in conflict zones by making civilian casualties visible, verifiable, and memorable.	0	0	1	MEDIUM	Generic contribution claim with no specific gap or delta.
C03	It demonstrates how mixed-methods approaches can bridge quantitative and qualitative understandings of casualty data.	0	0	0	HIGH	Direct application of existing mixed-methods framework.
C04	It identifies specific factors that contribute to trust-building in open-source humanitarian datasets.	0	0	1	MEDIUM	No gap identified, no baseline for comparison.
C05	It examines the role of distributed verification practices in establishing data credibility.	0	0	0	HIGH	Examines known concept in specific context.

of institutional distrust.

C07	It provides insights into the relationship between data transparency and moral witnessing.	0	0	1	MEDIUM	Connects existing concepts without novel synthesis.
