4 Metrics

Overall Dimension Scores

C01	conflict settings by bridging quantitative health surveillance with qualitative moral witness narratives, interpreting statistical data as speech-acts of testimony.	0	0	1	MEDIUM	Conceptual bridge between existing domains; no explicit gap or delta.
C02	The study demonstrates how institutional consistency in reporting fosters credibility through repeated metrics that function as truth-claims resisting denial.	0	0	1	MEDIUM	Applies existing credibility theory to specific context; no novel mechanism.
C03	It reveals how audience interpretation transforms when statistical evidence is contextualized within testimonial narratives, elevating epidemiological reporting to moral communication.	0	0	1	MEDIUM	Describes transformation process; no comparison to baseline.
C04	Finally, it provides insights into how structural constraints on health systems function as mechanisms of	0	0	1	MEDIUM	Applies Fricker's framework to health system context.

Novelty Flags
